PROFILE

Grade 11 student graduating early in June 2026 with 5+ years of programming experience across full-stack web, AI, and embedded systems. Built and shipped projects involving LLMs, automation, and developer tooling. DECA Provincial Champion, FIRST Robotics Blue Banner winner, and founder of Sinclair Secondary School's Coding Club.

EDUCATION & HONOURS

Sinclair Secondary School

Expected Jun 2026

Ontario Secondary School Diploma • Ontario, Canada

- GPA: 4.0 | Graduating one year early | Incoming mechatronics engineering student
- **Hack Club High Seas:** ranked 5th globally among thousands of student builders worldwide
- **DECA ICDC:** Provincial Champion, Financial Services Team Decision Making
- **FIRST Robotics:** Blue Banner winner, Team 9621, rookie year

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C++, Bash

Frameworks & Tools: React, Next.js, Node.js, Prisma, SQLite, Git, REST APIs

AI & APIs: OpenAI API, Claude API, LLM fine-tuning, vector embeddings

Other: Web scraping, browser automation, CI/CD, Excel, PowerPoint, Notion

EXPERIENCE & LEADERSHIP

Founder & President, Coding Club

Sep 2023 – Present

Sinclair Secondary School • Ontario

- Founded and grew Sinclair Secondary School's Coding Club to 30+ members, organizing hackathon prep sessions, workshops, and inter-school code reviews.

DECA Provincial Champion (ICDC)

2023 – 2026

DECA Ontario • Financial Services Team Decision Making

- **Won DECA Provincials** in Financial Services Team Decision Making and advanced to ICDC, competing against top teams from across Canada.
- Prepared and presented **financial case recommendations** under strict time constraints in live judged role-play scenarios.

FIRST Robotics — Blue Banner Winner

2023 – 2024

Team 9621 • First Year Competing

- **Won a FIRST Robotics Blue Banner** in rookie year, contributing to mechanical design, embedded C++ programming, and systems integration under a 6-week build cycle.

PROJECTS

LinkedIn Growth OS — Full-Stack Content Intelligence Platform

2026

React.js, Next.js 14, TypeScript, Prisma, SQLite, Claude API • Full-stack personal project

- Built a full-stack analytics and content intelligence platform for tracking LinkedIn post performance, including 19 API routes, 41 React components, and ~10,000 lines of TypeScript.
- Developed a Day 1/7/30 scoring engine that benchmarks posts against historical performance across 9 metrics and outputs a normalized 0–100 performance score.

- Integrated AI-powered post generation, hook generation, post analysis, and growth insight features using the Claude API with database-level caching and rate limiting.

Crawl / OpenCrawl — Autonomous SEO & GEO Platform

GenAI Genesis 2026

React.js, Python, LLM APIs, Web Scraping • Co-built with Nitya Savaram • github.com/Nityasav/openclawseo

- Built an agentic SEO platform during a hackathon weekend using React, Python, web scraping, and LLM APIs.
- Collaborated across full-stack development, scraping infrastructure, and AI integration to deliver a working prototype under a hard deadline.
- Presented the product to judges and industry professionals as part of the final competition demo.

Pyros — Wildfire Detection AI Agent

Hack Canada 2026

Python, Computer Vision, Voice AI • github.com/broiisapro/HackCanada-NRM

- Built a real-time wildfire detection system with an AI voice agent in 24 hours at Hack Canada, competing against 208 projects and 693 participants.

VantageAI / DECA Grader — Fine-Tuned LLM Case Evaluator

2024 – Present

Python, OpenAI Fine-Tuning • Active pilot with DECA Ontario

- Fine-tuned an LLM to evaluate DECA business cases; currently piloting with DECA Ontario and used to grade 200+ student submissions.
- Built tooling for automated rubric evaluation, scoring consistency, and written feedback generation.

APEX — High-Altitude Balloon Spectroscopy Platform

June 2025

Team Lead • Embedded Systems, Data Analysis • github.com/broiisapro/Apex

- Led a student team in designing and launching a high-altitude spectroscopy payload to 100,000 ft for atmospheric data collection and analysis.

commitgpt — LLM-Powered Git Hook CLI

2026

Python, Git, GitHub, Anthropic API • github.com/broiisapro/commitgpt

- Built a Git-integrated CLI tool that automatically generates conventional commit messages using an LLM.
